Professional Summary

Full Stack Developer with 4 years of experience in building responsive and scalable web applications using **React.js**, **Python**, **Node.js**, and **Google Cloud Platform (GCP)**. Delivered production-ready solutions for enterprise clients, including Mahindra & Mahindra, by integrating cloud services, enhancing UI performance, and collaborating with cross-functional teams. Proficient in frontend and backend development, API integration, and deploying cloud-native applications.

Professional Experience

11/2025 – Present
Mumbai, India

Neosoft

MERN Stack Developer - SMBP Project

Developed backend modules for a role-based service management system using **Node.js**, **Express.js**, **MongoDB**, and **Prisma ORM**. Implemented booking lifecycle management, technician assignment, and payment processing with JWT-based authentication and role-based access control. Built scalable REST APIs with pagination and efficient data modeling, integrated audit logging for traceability, and ensured secure branch-level data isolation. Leveraged AI-assisted development tools such as **Claude AI** and **ChatGPT for API design, debugging**, and productivity enhancement.

03/2023 – 10/2025
Mumbai, India

UpSolve (Client: Mahindra & Mahindra)

Full Stack Developer – Speech AI Project

- Integrated GCP services such as **Compute Engine**, **BigQuery** using **SQL**, **Cloud Functions**, and **Cloud Storage** using **Python**, reducing latency and improving backend efficiency .
- Built a **secure login** interface and analytics dashboard using **React.js** with **Context API** and **custom hooks**; **optimized component** rendering to reduce initial load time.
- Led prompt engineering and model fine-tuning using **LLaMA**, boosting AI output accuracy aligned with business needs.
- Collaborated with 5+ engineers across teams (SF, DMS, MRC) to deliver high-performance cloud-based solutions.
- Automated deployment processes using **Python scripts** and **cloud tools** , increasing release speed and improving overall scalability.

Android Developer– Clamp Deduction Project

- Designed and implemented Android applications using Java, XML, and Android Studio, improving mobile app performance and UI responsiveness.
- Delivered internal-use mobile tools, enhancing productivity for over 100 team members.
- Developed new features based on user feedback, reducing bug rates and improving stability across releases.
- Used **Node.js** and **Express** to create APIs for saving data in the database, enabling smooth data integration between the app and backend.

02/2022 – 01/2023
Mumbai, India

Mindstine Academy

MERN Stack Developer

- Developed a full-stack web application allowing users to upload files, update descriptions, and view their historical data using **Javascript**, **React.js** with functional components and state management.
- Built **RESTful APIs** with Node.js and Express.js to support file upload, URL mapping, and metadata handling, with secure request validation and structured response formatting.
- Integrated **MongoDB** for data storage and retrieval, ensuring efficient document indexing and scalable **NoSQL** schema design.
- Enabled seamless user experience by integrating frontend and backend through **Axios**, improving interaction speed and reducing latency.
- Collaborated using Git for version control and agile sprints, delivering features on time with sprint success rate.

Skills

Frontend: React.js, JavaScript, Material-UI, Tailwind , Axios, Redux, TanStack Query

Backend: Node.js, Express.js, NGINX, GraphQL, Python (Flask)

Database: MongoDB, Prisma ORM, BigQuery, SQL

Cloud & DevOps: Google Cloud Platform (GCP), Vertex AI Workbench, Cloud Functions, BigQuery, Compute Engine

Mobile: Java, Android Studio, XML layouts, Android SDK

Version Control: GitHub, GitLab

Certificates

Datacom Software Development Job Simulation on Forage - July 2025

- Completed a simulation focussed on how the software development team at Datacom approaches their work
- Reviewed a web application and planned for future improvements
- Identified the root cause of bugs and implemented a fix to improve the application

React.js from Mindstine Academy

ReactJs from SkillUp by Simplilearn(07/2022) 

Web Designing from Asterix Solution(09/2019) 

Java Programming from Great Learning (04/2022) 

Education

Mumbai, India

B.C.A (Bachelors in Computer Application)

Yashwantrao Chavan Maharashtra Open University

C.G.P.A 7.78
